1. Two elections will be held. Both will be held at the same time and place with the same election officials presiding. Both elections are necessary because you must own taxable property in the School District to vote in Election No. 2, but you do not to vote in Election No. 1. Anyone qualified to vote in Election No. 2 is automatically qualified to vote in Election No. 1.

3. Separate ballot and stub boxes will be provided.

4. In Election No. 1, all persons who are qualified electors of the District are entitled to vote, meaning residents of the District who hold a current poll tax receipt, or are exempt. Property ownership is not a requirement of the first election. Ballots for this election will be pink in color and provide but one proposition, as follows:

"FOR THE ADOPTION OF SENATE BILL NO. 116, CHAPTER 528, ACTS OF THE 54TH LEGISLATURE AT ITS REGULAR SESSION 1955."

"AGAINST THE ADOPTION OF SENATE BILL NO. 116, CHAPTER 528, ACTS OF THE 54TH LEGISLATURE AT ITS REGULAR SESSION, 1955."

5. At Election No. 2 only persons who are qualified electors of the District, who own taxable property and who have duly rendered the same for taxation, are entitled to vote. The ballots for this election will be white in color and will provide two propositions as follows:

PROPOSITION NUMBER 1

"FOR MAINTENANCE TAX."

"AGAINST MAINTENANCE TAX."

PROPOSITION NUMBER 2

"FOR THE ISSUANCE OF BONDS AND THE LEVYING OF THE TAX IN PAYMENT THEREOF."

"AGAINST THE ISSUANCE OF BONDS AND THE LEVYING OF THE TAX IN PAYMENT THEREOF.'

Vaccination Of Animals Against Rabies Urged

Winfred Taylor, senior sanitarian with the McKinney - Collin County Health Unit announces that the Health Unit office has received a state-wide rabies report for the 34 day period including December 30 to February 2, 1957. Mr. Taylor points out that the incidence of rabies, even during these winter months is sufficient enough to warrant the utmost precautions around unvaccinated animals.

During this period of time there were a total of 536 animal heads examined by the Laboratory of the State Health Department. Of these, there were a total of 50 positive findings or 50 heads that were found to contain the dread rabies. These 50 positive heads were from the following animals: dogs 22, cats 1, fox 19, skunk 3, and bovine 5. These figures take into consideration only the animals that were examined and, of course, make no allowance for, perhaps, many others, that may have died of rabies without having the disease diagnosed.

Mr. Taylor points out that it is very necessary for all owners of pets to have their pets vaccinated against rabies at least once a year. He further states that the number of stray dogs in McKinney, running at large without vaccination tags is all too numerous. The City will continue its campaign to pick up and impound these stray animals.

The latest case of animal bite occurred in Wylie Thursday when a dog bit a four year old child on the left eyelid.

Mr. Smith has not received any help on collecting these recepticles, and he has picked them up as time has permitted. He thinks that he has now taken up most of the containers in McKinney, but if any have been overlooked, a reminder in the form of a phone call to LI 2-4132 will bring someone down right away to pick up the container. Response of the people to the posters has been very good this year, Smith said, and he thanks each person who contributed and each merchant who allowed the container to stay in his place of business. The final total of funds collected for the March of Dimes this year will soon be announced.

Mr. Smith said that numerous people have mailed in checks this year, many of whom were away from home the night of the Porch Parade. Ed Veigel Announces For School Trustee

On September 12, 1956, I was appointed by the Board of Trustees of the McKinney Independent School District to serve as a trustee during the unexpired term of a member who resigned. I have found the trustees to be a very able, conscientious and dedicated group.

I have met with them on many occasions to consider at great length the many and varied problems involved in the operation and maintenance of a public school system.

My participation in the deliberations of the school board, has offered me a greater sense of satisfaction and accomplishment than any other public service I have been privileged to perform.

I am the father of four children, two of whom are presently enrolled in the McKinney public schools. I would like to have the privilege of continuing my service for a new term of office.

I therefore want to take this opportunity to announce my candidacy for re-election to the Board of Trustees of the McKinney Independent School District on April 6, 1957.

ED VEIGEL

Voters Favor Celina-Alla Consolidation

Elections, held in the Celina and Alla School Districts, Thursday, went in favor of consolidating the two districts, announced R. E. Murray, superintendent at Celina, who was in McKinney Friday.

The election at Celina carried an almost two-to-one majority with 210 votes for the consolidation and 119 against.

In the Alla community the voters favored the consolidation 61 to 18. The consolidation will be officially declared at the meeting of the County Commissioners' Court Monday.

In commenting upon the consolidation, Supt. Murray stated that a new school board of seven members, will be elected April 6, and that the two schools will continue to operate upon the present basis for the remainder of this year. At the beginning of the new school term, next fall the new school will be in effect, with both the Celina and Alla school plants utilized.

The two old school boards had tentatively proposed that the high school be located at Alla and that the elementary schools operate in Celina. However, according to law, the old board has no legal authority to designate where the school will be. The new system will include a high school, junior high and elementary schools, states Supt. Murray.

NEW MACHINE CHECKS INTERIOR QUALITY OF FRUITS AND VEGETABLES

How many times have you wished that you could see what's under the skin when buying fruits and vegetables? No matter how carefully you pick and choose these items, you're never really sure what they're like on the inside until they're opened.

The U. S. Department of Agriculture has just developed a machine that can show what's inside of fruits and vegetables in the way of color and other quality related factors. It can be done without damaging the merchandise, too. This new device is known as the "Rephobiospect." It sends various colored light through the fruit and produces an electrical signal proportional to the amount of light passing through. This electrical signal is automatically recorded on paper. The resulting graphs show show measurements that can be related to color and other quality factors inside the fruit.

At the present time, the Rephobiospect is strictly a research tool. Most of the work done with it has been on tomatoes. This machine could, however, be adapted for use in a fast moving assembly line in a packing or processing plant. Used in this way, the machine could check quality as fast as fruits or vegetables, could be mechanically handled.

1957 HYBRID GRAIN CONTEST RULES ANNOUNCED

Rules for the 1957 Texas hybrid corn and grain sorghum programs have been released by the Texas Certified Seed Producers Inc., report Extension Agronomists.

Farmers, 4-H and FFA members are eligible to enroll in the program say the agronomists. Only comercial hybrid grain seed growers, their employees, and members of their families are barred from participation, they add.

Awards in both programs will be made through fifth place. Corn contestants must plant either of these hybrids: Texas 26; 28; 30; 32; 34; 36; 9W; 15W or 1W. Eligible sorghums for competion are: RS 590; Texas 601; RS 610; Texas 611; Texas 620; RS 650; and Texas 660. A minimum of one acre is required for entry and some sections of the state will sponsor both an irrigated and non-irrigated contest.

Agronomists favor the planting of certified seed. The term "certified" denotes seed free from inert matter, weed seed, and other crop seed as well as ability to produce higher quality yields. Certified seed are easily spotted by the Blue tag and State Seal on the bag.

Local county agents can supply complete details on these 1957 production programs.

Governor Price Daniel has proclaimed the period from March 2-9 as 4-H Week in Texas. The same period will also be observed as National 4-H Club Week and the 117,257 Texas 4-H members will join with the more than two million in the nation in observing the special week.

4-H club work is the junior phase of the Agricultural Extension Service's work with rural residents. Forerunners of the present day 4-H clubs were the corn clubs for boys and the tomato clubs for girls. The first such club organized in Texas by a county agent was in Jack county in 1907. The late Tom Marks was the county agent. Today 4-H members conduct demonstrations covering most phases of farming, ranching and homemaking.

Chemicals of many kinds are used by agricultural producers in ever-increasing amounts as a regular part of their production program. But, warns the Texas Farm and Ranch Safety Council, all chemicals should be used exactly as the manufacturer suggests. Failure to observe the recommendations given for safe handling and use of farm used chemicals can result in great personal injury or even death. Don't take chances, follow the manufacturer's directions to the letter.

NEWS FROM THE BOARD OF SUPERVISORS —of— THE COLLIN CO. SOIL CONSERVATION DIST.

Any farm operator in this area, whose crop yields gradually keep climbing, is almost sure to be a clover grower. Where sweet clover is a regular part of his crop rotation, planted possibly every third year, the farmer sees his land benefitting from this clover treatment in many ways. Such observations are being made every year by cooperators throughout the Collin Soil Conservation District.

Some farmers say they appreciate the way clover mellows and puts new life in tight, crusty soils. L. V. Cole, of Rhea Mills, states, "My land will plow easily in August following clover, but land where clover was not grown usually is too dry and hard to plow."

"During that hard rain, I didn't get a bit of runoff from my clover field," is an often heard statement. The way clover roots penetrate our tight, heavy soils, even where there is a hard pan, has given sweet clover a high reputation as a soil conditioning crop. It is not strange then, that even a hard rain soaks in on clover land, where the moisture is stored for producing the next crop.

Three varieties, or types of sweet clover are being grown in the Collin Soil Conservation District. Hubam is the white-blossomed annual. It has been the most popular variety because it matures in four or five months after planting. White Biennial is also a white-blossomed variety, but it does not mature or make seed crop until its second year. Madrid is becoming more widely planted each year; it also requires two seasons to mature. Where a summer legume is needed in a short rotation, Hubam is the logical choice of most farmers. However, where a legume is needed for a longer period of grazing or to do a thorough job of soil conditioning, Madrid has much in its favor. The outstanding good characteristic of White Biennial is that it grows fairly well even on thin rocky soils.

C. L. Furr, of Rhea Mills, has stated on several occasions that Hubam clover has proved to be a valuable crop for him. He likes the way it enriches the soil for the crops that follow it. The seed which he harvests as a cash crop has brought approximately as much income per acre as any other crop he grows.

Herman Robinson, southwest of Cottage Hill, has used both Hubam and Madrid clover for soil improvement, hay and grazing. While he usese terracing and crop residue management along with cover crops, in his well coordinated conservation program, he gives clover much of the credit for increasing his crop yields over the past five or six years.

W. M. (Jake) Gibson of Melissa states that he has been using sweet clover for nearly a generation, and that its soil improving qualities are far above any other legume he has tried.

As the clover planting season gets started, farmer are fortunately finding a plentiful supply of seed locally. Experienced growers like to plant any of the three sweet clovers between February 15 and the last of March. Fertilizing with about 200 pounds per acre of 20% phosphate (or its equivalent) has increased growth considerably during most seasons. This need for fertilizing is explained by the fact that soil tests show nearly all of our blacklands soils to be deficient in phosphate. At planting time the seed should be inoculated according to directions on the can of inoculant. From 15 to 20 pounds of seed are usually drilled per acre.

A group of landowners from Lamar County toured the Honey Creek Watershed north of McKinney, Wednesday to look at floodwater retarding structures. Louis Williams from Paris, leader of the group of county commissioners and landowners, stated that many of them were involved in proposed structure sites in Aud's Creek watershed near Paris.

J. M. Norton, Work Unit Conservationist from McKinney, and Joe Gibbs, Engineering Specialist from Fort Worth, were the Soil Conservation Service representatives conducting the tour. At the Fred Roach Estate, eight miles northwest of McKinney, the group inspected a floodwater retarding structure and reservoir which were constructed four years ago. At the Howard Logan farm, northeast of Celina, a structure was seen which was completed last summer. Northwest of Weston, on the Lindsley and Robinson farms, a structure under construction was inspected.

The visiting group's Aud Creek project is in the process of being set up under the Public Law 566 Program, (Watershed Protection and Flood Prevention Act). Such projects are initiated by local soil soil conservation districts, where a local group of people assumes the responsibility for a portion of the costs. Each project is a local undertaking with Federal help, not a Federal project with local help.

Farm Club Women Attend Cooking Demonstration Here

A "Use of Electrical Appliances" school was held in Johnson's Furniture Store Tuesday, February 26 starting at 10:00 a.m. lasting until 2:30 Forty-seven home demonstration kitchen leaders and presidents attended from 16 different communities as reported by the Home Demonstration Agent, Mrs. Lurline C. Daspit.

Mrs. Vena Phillips, of T.P. & L. gave a demonstration on meal preparation using the oven, skillet, roaster and deep well. The food prepared before lunch was served as a lovely luncheon for the group present.

At 1 p.m. Ted Uptmore, Farm Service Agent, of T.P. & L., gave a demonstration on the size of wiring to be used in the home for adequate home use. Many questions were asked by the women present. The demonstration showed the over loading of the electrical wiring by the use of a fan, toaster and other appliances. The value of the proper size was stressed very efficiently.

After the demonstration on wiring Mrs. Phillips gave a demonstration on the use of small kitchen equipment.

A demonstration was given on the use of the waffle iron in cooking corn bread and the frying of pies in the electric skillet.

The leaders of the home demonstration clubs took notes and were given recipes. Each leader will repeat the information that was learned to her local club which includes 400 rural women of Collin County.

At the close of the event Choice McClure of Johnson's Furniture Company presented Mrs. Oscar Greenwood, of the Celina Home Demonstration Club and Mrs. Earnest Miller, of the Westminster Home Demonstration Club with a beautiful table lamp as a door prize. Each club lady present was presented a pair of pinking shears as a gift. Finney's Bakery gave each of the club women a loaf of bread.

Newsome Insurance Company Moves To New Location

The R. F. Newsome Insurance Company has moved from the Southwest corner of the public square to 106 West Virginia St., two doors West of Smith Jewelry Company. Mr. Newsome states that the company is moving to a ground floor location for the convenience of patrons of the company.

R. F. Newsome is the third generation of Newsomes to occupy the same offices on the Southwest corner of McKinney's public square. For many years the late I. D. Newsome operated a general merchandise store there. When the building was torn down and rebuilt, it was occupied by the late E. A. and W. B. Newsome, brothers, the former being the father of R. Fitzhugh Newsome.

They conducted a farm loan business for many years. R. F. Newsome was associated with them from 1915 to 1923 when he established his own business and began writing all forms of insurance. He has continued that line of business since.

The Newsome building was sold to the late W. R. Abernathy several years ago, but the Newsomes Insurance Company continued to occupy the same suite of offices on the upper floor until this week. Mr. Newsome states that the move to the new quarters will be a great conventience to his customers.

Assisting Mr. Newsome in operating the business are his wife, Mrs. Ella Rhea Newsome and Mrs. Billie Evans.

Blues Defeated 27-14 In Intra-Squad Game

By NORMAN SCOTT

The Whites defeated the Blues, 27-14, in a regulation intra-squad game at Newsome Stadium Friday night as the McKinney High Lions ended up three weeks of spring football drills.

After a scoreless first quarter, White quarterback Robert Joplin connected with end Don Wharton for 14 yards and a first down on the Blue 28 early in the second to set the stage for first score of the game. From the 28, halfbacks C. W. Williams and Tommy Joe Crutcher and fullback Robert Gracy moved for two first downs to 3 and Gracy carried over right tackle for the marker. Wharton's placement was low.

Charlie McIntire hauled in the ensuing kick-off on the Blue 18 and broke loose for 63 yards before Joplin knocked him out of bounds on the White 19. McIntire, Kenneth Locke and Bob Byrd carried to the 3 and Locke blasted left tackle for the score. McIntire circled right end to put the Blues out front 7-6.

Williams took the Blue kick-off on his 5 and rambled for 58 yards before Ben Pior overhauled him on the Blue 37. Williams, Crutcher and Gracy again combined to place the ball on the 3, with sub fullback Bennie Jetton carrying over on the next play. Wharton's palcement was good and the Whites had a 13-7 lead.

With the third and fourth units challenging each other in the final three minutes before the half, halfback Jim Hurley of the Blues broke over tackle for 51 yards to the White 10, and in two carries, Hurley picked up 8 to the 2. Vic Petricka then hit right tackle for the Blues' second score. McIntire converted and the Blues led 14-13 at the intermission.

The third period failed to produce a score but the Whites started a drive from their 30 at the start of the fourth, and featuring a 13-yard aerial from Joplin to Williams, and a 17-yard run by Williams, the Whites chalked up 3 first downs in advancing to the Blue 22. After Gracy picked up 3 to the 19, Joplin passed to Wharton who made a good catch in the end zone for the touchdown. Wharton again converted.

Tackle Charlie Powell recovered a Blue fumble on the White 32 to pave the way for the next White score. The Whites added three more quick first downs, one of which was a 26-yard scamper by halfback Clifford Hendricks. With the ball on the 9 after the third first down of the series, halfback Ronald McAdams took a pitchout from Joplin and crossed the double-stripe near the flag as he went wide to his left. Wharton's placement was good again and ended the scoring for the night.

The Whites dominated the statistics with 25 first downs, on 300 yards rushing, and 69 passing on 8 completions by Joplin in 11 attempts.

The Blues managed 12 first downs, 173 on the ground, and had only 24 in the air on 2 completions in 12 attempts.

The highlights of the tilt were the kick-off returns by McIntire and Williams and Wharton's fine catch of Joplin's toss for a 6-pointer, along with Hurley's 51-yard dash.

Williams turned in the most impressive performance in the ball-carrying department as the White forward wall of Crutcher and Wharton at ends, Powell and Riddle at tackles, Dowell and Brockman at guards, and Wyatt at center, cleared the way with some crisp blocking. Gracy also looked impressive at the fullback spot for the Whites, along with Tommy Crutcher from his halfback spot.

McIntire, Byrd, and Locke carried the brunt of the ball-carrying for the Blues.

There was some encouraging defensive play by both sides, but Powell and Wharton of the Whites, and tackle Charles Carrell of the Blues, turned in the most consistent performances of the night.

In a preliminary game, the Whites defeated the Golds, 27-19, as coach Scott Johnson's freshmen of next fall, clashed in an intra-squad affair.

THE PEOPLE

VOTE SAT. THE 9TH ON THE SCHOOL BOND ISSUE

As officials of the McKinney Schools Tax-Payers Association we wish to make the following statement: Strong in the conviction that we should have modern school buildings for our children, but believing that the plan proposed by the McKinney Independent School District Board for the issuance of bonds to cover the cost of construction of a high-school building, a junior high school building and an elementary-school building would be too costly, and the taxes necessary to suport the issue of the bonds too heavy for the patrons of the schools district to bear, we recommend the following in lieu thereof:

Immediately start construction of a basic high-school unit from the $511,000.00 potential bonds we now have at hand, without the issuance of any new bonds of any kind in the immediate future. This we know, can be done. We further recommend, that in view of the present inflated values, no long-range building program be entered into in the foreseeable future, but that each school building be financed and completed before the beginning of another. We are firmly convinced that we can build modern school buildings in this district without placing on ourselves, our children and our grandchildren, excessive property valuations and heavy taxes that may, in the future, tend to destroy the aims to which we all attain—better schools.

Small Percent Of Collin Vehicles Have Been Inspected

Unless Collin motor vehicle owners get a move on in the matter of having their cars and trucks inspected, stations in the country are going to be hardpressed to complete the job by the deadline, April 15.

At the last report only 17 per cent of the motor vehicles in the county had 1957 inspection stickers on windshields. By this time last year 51 per cent had secured the stickers.

State law requires that all motor vehicles be inspected by the deadline April 15. Failure to do so lays the owner liable to a stiff fine.

Meanwhile, 1957 license tags are going at a lively clip. New 1957 tags must be on cars, trucks and other motor vehicles by April 1.

Rev. R. B. Ring, pastor of the South Side Assembly of God Church, was in Waxahachie Thursday on official business for the church. He is Presbyter of the Denton Section.

Senior Life Saving Swimming Class To Be Taught Here

Ross Orenduff Jr., water safety chairman for the Collin County Chapter American Red Cross, announces a Senior Life Saving Class will be conducted here May 6 through the 16th at the Jaycee Swimming pool. At the conclusion of the class a water safety instructors' course will be held in Gainesville May 20 through the 24. However, Mr. Orenduff states that if there are enough persons completing the Senior life saving course, who are interested in an instructors' course, a class will be held here, and they will not have to go to Gainesville for this training.

The course is open to persons 18 years of age and over. Mr. Orenduff expects to have a full season swimming program in McKinney and with the courses which he plans, there will be sufficient instructors to work at Lake Lavon, and other pools in this area. At the present time there are only three men in Collin County holding the Red Cross Instructors certificate. They are Mr. Orenduff, Charles Pat Dowell and Mike Murphy.

A survey was made in the school here last November and of the 1,938 questionaires returned, it was found there are 1,157 who could not swim; 295 could swim only 75 feet and 347 who can swim 100 yards or more.

There is an urgent need for instructors throughout the county. In fact, the national average of drowning deaths is 18 per day, and about 50 percent were caused from inability to swim. The other 50 percent of drownings are caused from improper use of small craft.

Strong swimmers—both men and women—are invited to take advantage of these courses which will be offered later in the Spring. To receive certificates, the swimmers will be graded on written courses as well as swimming.

Seniors Plan Events Before Graduation

"Only Juniors and Seniors will attend the Prom," announced Principal D. F. Douglas in a recent Senior Class meeting.

There was some doubt as to who would be allowed to attend the Prom. Previously, it had been suggested that under-classmen be allowed to attend, if they had a date with a junior or a senior.

The class also "discussed" other business. Class colors were changed from "rainbow" to baby-blue and white. It was suggested by Carrol Craighead) that Carrol Craighead lead the seniors to their destination on Senior Day. The motion was not voted upon.

Destination for Senior Day hasn't been fixed. A committee from the class visit some likely dude ranch in the vicinity.

The final decision rests with the school administration and the sponsors.

Newsome Stadium was chosen as the site for garduation. Baccalaureate services will be held on May 26; the Senior Banquet, May 27; and graduation, May 28.

Railroads serving their Southwests in the drouth area, to make a 50 per cent drouth belt, and particularly the Texas Pacific, have found it necessary and advisable to buy newspaper space to tell America a little something about their farmers and ranchers.

But when these roads are asked by their customers in the drouth area to make a reduction in freight rates on hay shipments, they refuse.

$25,000,000 Contribution ...to Farmers and Ranchers

Within the past four years the railroads have contributed to the farmers, ranchers and dairymen, through a 50% reduction in rates on hay and other feedstuffs, 25 million dollars.

Both the Congress of the United States and the Legislature of Texas, by resolution, have expressed their thanks to the railroads for this substantial contribution.

Through the years the railroads have always extended a helping hand to their neighbors in times of disaster.

To us this is a basic responsibility of good Americans.
